

# Online with the CMC: Parts, Volumes, and Issues: Exploring Serials Cataloging

*Dr. Pamela Thomas, Bibliographic Grant Manager, IHLS/CMC*

Feb. 22, 2024

Good morning! My name is Dr. Pamela Thomas—you can call me Pam, and I will be presenting Parts, Volumes, and Issues: Exploring Serials Cataloging. Does your library purchase magazines, newsletters, newspapers, annuals (reports, yearbooks, or directories), journals, periodicals, memoirs, or proceedings? Do you need help with cataloging these complex materials? Let me lead you from the dark forest into the sunlight of cataloging print and non-print publications.

## What is a continuing resource/serial?

“A continuing resource is a publication in any physical or electronic format that is intended to be issued with no set ending, and generally carries numbering, dates or both. Serials and integrating resources are types of continuing resources. Serials are issued in separate parts, while integrating resources do not have separate issues. One of the main criteria that differentiate continuing resources from monographic resources is the publisher’s intention,” ALCTS, now ALA Core.

# Agenda

- Magazines
- Newsletters
- Newspapers
- Annuals (reports, yearbooks, or directories)
- Journals
- Periodicals
- Memoirs
- Proceedings
- Series (Books)

I will go over examples of each of these types of serials, focusing on parts, numbers, and dates. I will be using OCLC's Bibliographic Formats and Standards (BFAS) fixed field element, SrTp, Type of Continuing Resource, to define each of these serials. I will go over the fixed and variable fields of the MARC records the first time they appear, for the sake of time. Many of the records in this presentation are coded as AACR2 records, but most of those are hybrid records, with AACR2 and RDA elements. Some records in Connexion can't be edited by everyone, which could explain why some of these records have not been updated.

# Issues

CATALOGING  
MAINTENANCE CENTER  
Statewide Cataloging Support

- Sometimes issues of serials/continuing resources are cataloged as a standalone (usually a monograph)
- I will not be covering how to check in issues of periodicals/serials/continuing resources, since each ILS has a different procedure

# Magazines

CATALOGING  
MAINTENANCE CENTER  
Statewide Cataloging Support

- SrTp, code *g*
- Periodical addressing non-scientific, non-professional general interest topics. Magazines can be print or digital. If less granularity is needed, code *p* can be used.

SrTp or Type of Continuing Resource is coded as *g* for Magazine.

New lines is a print magazine. SrTp or Type of Continuing Resource is coded as g for magazine. BLvl or Bibliographic Level, is coded as s for serial. S/L is coded 0 for Entry Convention; 0=successive entry. The record follows the successive entry convention in which a new record is created each time a title changes or a corporate body used as a main entry or uniform title qualifier changes. The earlier or later title or name/title is recorded in a linking field ([field 780](#) or [785](#)) on each record. This has been cataloged using RDA guidelines; Desc or Descriptive Cataloging Form is coded as i for ISBD punctuation. Freq or Frequency is coded as q for quarterly. Notice in the variable fields that the 310 or Current Publication Frequency field also states that this publication is quarterly. Regl or Regularity is coded as r for regular. DtSt or Type of Date/Publication Status is coded as c for Continuing resource currently published. Alph or Original Alphabet or Script of Title is coded as a for Basic Roman, title does not include special characters or diacritics. Date 1 is 2023, the first year of publication, and Date 2 has 9999, which means that this is a current publication. There is one 264 field or Production, Publication, Distribution, Manufacture, and Copyright Notice with 2023 in brackets with a dash, so the publication date is assumed and it's a current publication. However, the rule is to only put the date in \$c when the issue is in hand. If the issue is not in hand, then a date would not be added. This title was cataloged using winter 2023, so the brackets should be removed from 264 \$c. The 362 1\_ or Dates of Publication and/or Sequential Designation—Unformatted note has Began with: Issue 1 (Winter 2023). There are two 588 notes or

Source of Description Notes; 0 as the first indicator is the Source of description and 1 as the first indicator is the Latest issue consulted. The 588 0\_ informs us that Issue 1 (Winter 2023) was the issue used to create this bibliographic record and also that the title was derived from the cover. The 588 1\_ has Issue 1 (Winter 2023) as the latest issue consulted, which was probably the only issue that had been published when this record was created. A 655 \_7 or Index Term—Genre/Form—Source is specified in \$2 of Periodicals. \$2 lcgft should be added to the record.

Creem magazine is a continuing resource (top left drop-down box). This has been cataloged using RDA guidelines. Form is coded o for online. SrTp or Type of Continuing Resource is coded as g for magazine. Date 1 is 1969, the first year of publication. The 006 field or **Fixed-Length Data Elements-Additional Material Characteristics** is coded m o d blank; m=Computer file/Electronic resource, o=online, d=documents, and blank=not a government publication. The 007 field or Physical Description Fixed Field (Electronic Resource) is coded as c (Electronic resource) in \$a and r (Remote) in \$b. There is an ISSN in field 022 0\_. There is a 222 field (Key Title). National centers assign ISSNs and key titles. You may enter the ISSN and key title if you are inputting a new record, and the ISSN and key title are clearly labeled on the item.

This is Newsletter: bulletin to management, fair employment practice, economic data. As you can see from the top left, this has been cataloged as a continuing resource. BLvl is coded as i or Integrating Resource. A bibliographic resource that is added to or changed by means of updates that do not remain discrete and are integrated into the whole. Integrating resources may be finite or continuing. Examples include updating loose-leaf publications, updating databases, and updating Web sites. S/L or Entry Convention is coded as 2 for Integrated Entry. A record is cataloged under its latest (most recent) title and/or responsible person or corporate body. Create a new record only for a major change in edition, a new work or a title merger or split. Use for integrating resources and electronic serials that do not retain their earlier titles. Desc or Descriptive Cataloging Form is coded a for AACR2. SrTp or Type of Continuing Resource is coded as I (letter I) for Updating loose-leaf. Bibliographic resource that consists of a base volume updated by separate pages which are inserted, removed, and/or substituted. Srce or Cataloging Source is coded as d for Other. Use to indicate that the source of the cataloging data is an organization other than a national bibliographic agency or a participant in a cooperative cataloging program. Conf or Conference Publication is coded as 0 (zero) for Not a conference publication. Freq or Frequency is coded as u for Unknown. The current frequency is not known. When code *u* is used in *Freq*, code *u* must also be used in *Reql*. Regl or Regularity is coded as u for Unknown. Date 1 is 1993, the first year the newsletter

was published. Let's move to the variable fields. The 043 field, Geographic Area Code, is coded n-us--- for North America, United States, which is reflected in the 650 fields \$z. Notice that there are five 246 3\_ fields (Varying Form of Title—No note, added entry). This means that there should not be a 5XX explaining any of these titles, but there should be 7XX fields with these titles. One of the 246 3\_ fields does have a note about the title, so the first indicator should be changed to 0, Note, no added entry. The other four 246 3\_ fields should be changed to 246 2\_, No note, no added entry. Notice that 260 \$c has 1993 enclosed in brackets, which means the date did not appear on the item itself, but was assumed, with a question mark, so the cataloger was not entirely certain that 1993 was the publication date, and there is a dash, indicating that this continuing resource is currently published. Remember that this information always needs to be reflected in the fixed fields (DtSt and Dates 1 & 2). However, the date should only appear in 260 or 264 \$c when the item is in hand, so the brackets should be removed or the date removed from \$c. It's okay that the 260 field was used for publication information. Continuing resource records should only be updated when there has been a major change to the periodical—change in title, change in publisher, change in place of publication, for example. The 300 field, Physical Description, \$a, extent, has 1 volume (loose-leaf) and also provides the dimensions in \$c, 30 cm. There should be a period after cm, since there is a 490 field. The 336-338 fields are coded for print materials. The 490 1\_, Series Statement—Series traced has the title as it appears on the item. Let's switch to the variable fields on the right. There are several 500 fields, General Notes. The first one could be changed to a 588 1\_, Source of Description Note--Source of description), if/when this record is updated to RDA. The second note informs us that the inserts are published weekly. The third note gives us one of the varying forms of title. The fourth note informs us that the indexes for Bulletin to management and Fair employment practice are updated quarterly. If/when this record is updated to RDA guidelines, a \$e, relator term, should be added to the 710 2\_, Added Entry—Corporate Name—Name in direct order. This is the name of the publisher. Finally, the 830 \_0 field, Series Added Entry—Uniform Title—No nonfiling characters, duplicates the series statement found in the 490 field.

336							text #b txt #2 rdcontnt						
337							computer #b c #2 rdamedia						
338							online resource #b cr #2 rdacarrir						

The carbon sequestration newsletter has been cataloged as a continuing resource. This is electronic/online, since Form or Form of Item is coded o for online. Orig or Form of Original Item is coded as s for Electronic. The original item is intended for manipulation by a computer. SrTp or Type of Continuing Resource has the code, s, for Newsletter. DtSt or Type of Date/Publication Status is coded as d, for Continuing resource ceased publication. Date 1 has 2001 for the first year of publication and Date 2 has 2013, the final year of publication. By looking at Freq or Frequency, m for monthly in the fixed fields and the 310 field or Current Publication Frequency; this has a monthly publication pattern. Let's take a look at the variable fields. I cut off some of the information in the 040

field, for display purposes. The 006 field or **Fixed-Length Data Elements-Additional Material Characteristics** is coded m o d f; m=Computer file/Electronic resource, o=online, d=documents, and f=Federal/national (type of government publication). There is a hyperlink to the pages with the codes on the resources slide of this presentation. The 007 field or Physical Description Fixed Field (Electronic Resource) is coded as c (Electronic resource) in \$a, r (Remote) in \$b, m in \$d (color, mixed), n in \$e (dimensions, 12 in.), and u in \$f (sound, unknown). There is one 246 1\_ field, Varying Form of Title—Note, added entry. Notice there is a subfield i, Display text, CRM (other title). Since this was coded as a Note, added entry, there should be a 500 field

with this title, which there isn't (you will see this on the next slide). So, the cataloger should either add a 500 with CRM or change the first indicator to 2, No note, no added entry. The 264 field has [2001]-2013 in \$c. The date should only appear in 264 \$c when the item is in hand, so the brackets should be removed, or the date removed from \$c.

## Electronic Newsletter Example, Continued

I did not include the 029 fields that are at the end of the MARC record, for display purposes. This is the rest of the MARC record for The carbon sequestration newsletter. The 362 0\_ field, Dates of Publication and/or Sequential Designation—Unformatted note, has July 2001-January 2013, the publication dates. The first 500, General Note, should be changed to a 588 1\_, Source of description note—Source of description. The second 500 tells us that annual indexes are included. The 538, System Details Note, gives access information and details. The 588, Source of description note, should have a first indicator of 1 for Latest issue consulted and that whole phrase can be removed. Notice that the four Library of Congress Subject Headings, 650 fields, all have \$v Periodicals. There is a 710 2\_, Added Entry—Corporate Name—Name in direct order. A \$e, relator term, should be added if/when a cataloger updates this record. The 785 00, Succeeding Entry—Display Note—Continued by, has the title, Carbon storage newsletter. The 856 40, Electronic Location and Access—HTTP—Resource has the URL for this publication.

I cut off some of the subfields from the 040 field for display purposes only. This is The Pantagraph, which has been cataloged as a continuing resource (see the type of format drop-down at the top left). Starting with the fixed fields. S/L or Entry Convention is coded as 0 (zero) for Successive entry. The earlier or later title or name/title is recorded in a linking field ([field 780](#) or [785](#)) on each record. There is a 780 00 field (on the right) which I will discuss in a minute. Desc or Descriptive Cataloging Form is coded as a for AACR2. Orig or Form of Original Item is coded as e for Newspaper format. The original item is printed in newspaper format. Newspaper format is when an item is on newsprint and/or looks like a newspaper. The serial does not need to fit the definition of a newspaper. SrTp or Type of Continuing Resource is coded as n for Newspaper. Freq or Frequency is coded as d for Daily. The resource is issued or updated once a day. May include Saturday and Sunday. Date 1 is 1985, the first year this title was published. Let's move to the variable fields. Notice that the 043 field, Geographic Area Code, is coded n-us-il for North America, United States, Illinois, and there are two corresponding geographical subject headings (field 651) shown on the right. There is a 130 0\_ field, Main Entry--Uniform Title--No nonfiling characters, Pantagraph (Bloomington, Ill.). There is also a key title, field 222 \_4 and the 4 as the second indicator means how many spaces of nonfiling characters there are, so three spaces for the and one space for after the. \$b, qualifying information, lets us know that this is the print version of the newspaper. The 260 3\_

Current/latest publisher field \$3, Materials specified, with 2019 ongoing, the Pantagraph was published in Bloomington, Ill. by Lee Enterprises (publisher). The 310 field, Current Publication Frequency, notes that the publication is daily. The 362 0\_ field, Dates of Publication and/or Sequential Designation—Formatted style, documents that the 149<sup>th</sup> year, 134<sup>th</sup> day was on May 14, 1985, and that the newspaper is currently published. From the screenshot on the right, there is one 500 field, General Note, informing us that the Pantagraph has been published by Pulitzer Publishing, Chronicle Publishing, and Pantagraph Publishing, but the dates are unknown. There are two Library of Congress geographic subject headings (651 \_0 fields). There are three fast subject headings. The 752 \_\_ fields, Added Entry--Hierarchical Place Name, give us the places of publication—Normal and Bloomington, Illinois. The 780 00 field, Preceding Entry—Display Note—Continues has \$t, title, Daily pantagraph (Bloomington, Ill. : 1891) and the first \$w with the Library of Congress Control Number and the second \$w with the OCLC number. The sn after DLC stands for serial number. LCCNs with the prefix *sn* were used prior to 2000 in records for serials authenticated by CONSER participants and the National Serials Data Program (NSDP). LCCNs with the prefix *sn* were also used prior to 1984 for serials authenticated by LC and held by LC, but given less-than-full cataloging. LCCNs with the prefix *sn* are currently used by LC and the United States Newspaper Program (USNP) for cataloging newspapers. The 856 41, Electronic Location and Access—HTTP—Version of resource, \$u, Uniform Resource Identifier, has the URL.

This is a newspaper on microfilm, The Petersburg Observer. As you can see from the top left drop-down, this was cataloged as a continuing resource. Form or Form of Item is coded as a for microfilm. Freq or Frequency is coded as w for weekly. Date 1 is 1878, the first year the Petersburg Observer was published. Let's move to the variable fields. The 007 field: \$a h for microform, \$b d for microfilm reel, \$d a for positive (positive/negative aspect), \$e f for 35 mm (dimensions), \$f u for unknown (Reduction ratio range/Reduction ratio), \$g b for black and white (color characteristics), \$h u for unknown (\$h=emulsion on film), \$i c for Service copy. A service copy is a microform made from another microform that is intended primarily for use rather than for production of other microforms. Most microforms used in libraries are service copies), and \$j u for unknown (Base of film). The 264 \_1 field has the place of publication in \$a, Petersburg, Illinois, Cain & Parks as the publisher in \$b, and in \$c, 1878-9999 in brackets, which matches Dates 1 and 2 in the fixed fields. The brackets indicate that this information did not appear directly on the item. However, the date should only appear in 264 \$c when the item is in hand, so the brackets should be removed or the date removed from \$c. In the 300 field or Physical Description, Microfilm reels is in \$a, extent, positive is in \$b, other physical details, and the dimensions, 35 mm are in \$c. The first 310 field or Current Publication Frequency has Weekly, reinforcing the w in Frequency in the fixed fields. The second 310 field informs us that this is published every Thursday. Notice that the 310 field does not

end in a period. There are some different 33X fields for microfilm, so I will give you a minute to look those over. The 340 field or Physical Medium \$g, color content, has monochrome, with \$2 (source of the term) rdacc for RDA color content and the second 340 field, \$o, polarity, has positive with \$2 rdapo for RDA polarity. The 362 1\_ field or Dates of Publication and/or Sequential Designation—Unformatted note has Began May 18, 1878, just providing more specific information when this newspaper was first published. The 520 field or Summary, etc. note lets us know that The Petersburg Observer was formed by the union of Menard County Times and Tallula Observer.

## Microfilm Newspaper Example, Continued

There are several Library of Congress subject headings and a genre/form term for Newspapers. Microfilms should be changed to a 655 0\_, since this is what this item is, rather than what it is about. A 655 \_0 could be added for Newspapers on microfilm as well. There are two 780 14 fields or Preceding Entry—Do not display note—Formed by the union of ... and ..., both starting with †t, Menard County Times and Tallula observer, and both with two subfield w's with the DLC (Library of Congress Control Number) and the OCLC number.

Notice that this field does not end in a period. The 362 0\_ field or Dates of Publication and/or Sequential Designation—Formatted style, Vol. 6, no. 1868 (Sept. 14, 1857)- which means that the current publication started with volume 6, no. 1868 on Sept. 14, 1857 and is ongoing. The 515 field or Numbering Peculiarities Note lists the dates when the newspaper was suspended. The three 530 fields or Additional Physical Form Available Notes provide the three other formats the New York times is in. The five 580 fields or Linking Entry Complexity Notes provide more information about editions and issues.

On the left, there are numerous subject headings. There is a 740 0\_ field or Added Entry--Uncontrolled Related/Analytical Title--No nonfiling characters, so the title does not begin with a, an, the, etc.: New York times on the web. I'm not sure why this field is here. There is a 770 0\_ field or Supplement/Special Issue Entry--Display note, has New York times magazine in \$t, title, the ISSN number is in \$x, and the DLC and OCLC numbers are in \$w, record control number. The 775 1\_ fields, Other Edition Entry--Do not display note, begin on the left and the 775 0\_ fields, Other Edition Entry--Display note, are on the right, and have the various names for the New York times publications. The subfields for the 775 field are: \$t, title, \$x, ISSN, \$w control number, and \$g, Related parts. The 776 1\_ field or Additional Physical Form Entry--Do not display note has two of the different formats: CD-ROMs and the web version. The 777 1\_ field or Issued With Entry--Do not display note, has an entry of Little times, which does not appear anywhere else in this record, so the assumption will need to be made that this title is like a supplementary issue. The 780 00 field or Preceding Entry--Display note--Continues has New York daily times in \$t, title, the ISSN in \$x, and control numbers in \$w. The 787 1\_ field or Other Relationship Entry--Do not display note, has New York times book review in \$t, the ISSN in \$x, and control numbers in \$w.

This is the Sangamon, Illinois county directory and was cataloged by the CMC staff. This is cataloged as a Continuing resource (top left, drop-down box), and SrTp or Type of Continuing Resource is coded as t for directory. GPub or Government Publication is coded as l for Local. Freq or Frequency is coded as a for annual. Date 1 has 1971, the year this directory was first published. In the 264 \_1 field, you see in \$c that the year is formatted as 1971- indicating this has been an ongoing publication since 1971. Let's move to the variable fields. Field 006 or Additional Material Characteristics, s=serial, a=annual (Frequency), r=regular (Regularity), t=directory, from Type of Continuing Resource, l (letter l)=local from the Government Publication fixed field), 0=not a conference publication, a=Basic Roman (from Alph or Original Alphabet or Script of Title) and 0 for successive entry (S/L: Entry Convention). The title main entry is Sangamon, Illinois county directory. The 300 \$b has maps with a corresponding 340 or Physical Medium field \$p map \$2 rdail. The 310 field or Current Publication Frequency has Annual. The 334 field or Mode of Issuance has multiple units. Besides map in the 340 field, there is another 340 with monochrome in \$g.

588	0	Volume 1962-1963 ; title from title page.
588	1	1987-1988.

The CMC cataloged Benton Woman's Club: Benton, Illinois as an annual/continuing resource (see the top left drop-down box). Cont or Nature of Contents is coded as r for Directories. EntW or Nature of Entire Work could also be coded r for directories. This is an annual publication from the a in Freq (Frequency) in the fixed fields as well as the 310 field or Current Publication Frequency, noting that this is an annual publication. Date 1 has 1962, the first year this directory was published. Let's move to the variable fields. The 110 2\_ field or Main Entry--Corporate Name--Jurisdiction Name has Benton Woman's Club with compiler as the relator term in \$e. The 264 \_1 field has 1962- in brackets in \$c, indicating that the date was not on the item itself and the dash tells us that the publication is current/ongoing. However, the date should only appear in 264 \$c when the item is in hand, so the brackets should be removed. The first 500 field or General Note informs us that the Benton Woman's Club was instituted in 1914 and federated in 1915.

# Print Directory

Unlike the Benton Woman’s Club, the St. Anthony of Padua is not an annual. The fixed field for Freq or Frequency is coded u for unknown. The 264 \$c has 1989- showing that this is an ongoing publication since 1989. The 310 field, or Current Publication Frequency, states that the publication frequency is unknown. This has been cataloged as a continuing resource (top left drop-down). SrTp or Type of Continuing Resource is coded as t for Directory. EntW or Nature of Entire Work is coded as r for Directories. Date 1, 1989, is the first year the directory was published. Let’s look at the variable fields. The 334 field or Mode of Issuance has multiple unit. The 340 fields or Physical Medium provide more details: polychrome, illustration, and portrait.

This is the 211 community services directory. Some of the subfields from the 040 field have been cut off, for display purposes only. This has been cataloged as a Continuing Resource (top left, drop-down box). ELvl or Encoding Level has been coded M for added as a batch process, but it is now encouraged to only use numeric codes for this field. Form or Form of Item is coded as o for online. Date 1 is 2009, the first year this directory was published. Let's look at the variable fields. The 043 field or Geographic Area Code has n-cn-ab, n for North America, cn for Canada, and ab for Alberta. There is a 260 field with publication information, which is fine, since this was cataloged following AACR2. There is a 2009- in \$c, indicating that this was published in 2009 and the hyphen tells us that this is an ongoing publication. The 310 field or Current Publication Frequency has Annual. The 362 1\_ field or Dates of Publication and/or Sequential Designation—Unformatted note has Began with 2009/2010. The 506 field or Restrictions on Access Note states that Access is limited to authorized users and institutions. There are many 6XX subject headings from both screenshots.

This screenshot is from the SHARE catalog. The record in Connexion does not have \$n in the 245, so I wanted to showcase this version of the MARC record. Fantastic four is the title and the first \$n (number of a part/section of a work) is Feb. 1994-April 2011 and the second \$n (number of a part/section of a work) is Jan. 2013- indicating that this is a current/ongoing periodical. There are several Varying Forms of Title or 246 fields. The 310 field or Current Publication Frequency has Monthly in \$a, Current Publication Frequency, Jan. 1972- in \$b, Date of current publication frequency, so this title has been ongoing since Jan. 1972. The 321 field or Former Publication Frequency has Frequency varies in \$a and the dates Nov. 1961-Dec. 1971 in \$b, Dates of former publication frequency. The 362 1\_ field or Dates of Publication and/or Sequential Designation—Unformatted note, has the began with information in \$a and in \$z the Source of information. There are several General Notes or 500 fields with useful information. The 515 field or Numbering Peculiarities Note informs us that each issue is called Vol. 1. There are two genre/form term subject headings. The 767 0\_ field or Translation Entry—Display note has the title in German in \$t and then the DLC (Library of Congress) control number and the OCLC number in the two \$w's.

This is Illinois libraries, an electronic continuing resource. SrTp or Type of Continuing Resource is coded as p, for periodical. GPub or Government Publication is coded as s for State, provincial, territorial, dependent, etc.. It is a ceased publication (DtSt is coded as d). Date 1 is 1919, the year the publication began, and Date 2 is 2007, the year the publication ceased. Let's look at the variable fields. The 260 field with the publication information is fine, since this was coded in Desc as a for AACR2. The 260 \$c has -2007. If a cataloger updates this record, this should be changed to 1919-2007. If Date 1 in the fixed fields had a date with u's in it, then it would be formatted this way. However, this publication is ceased since there is an "end" date. The 310 field or Current Publication Frequency has 4 times a year. Because this is a ceased publication, \$b 1919-2007 should be added.

## Electronic Journal Example, Continued

Here is the rest of the MARC record for Illinois libraries. The 550 field or Issuing Body Note documents which issuing body was responsible for which volumes or years. There are quite a few subject headings or 6XX fields. A 655 \_7 could be added for Periodicals. Subfield e's or relator terms should be added to the 7XX fields.

# Memoirs

CATALOGING  
MAINTENANCE CENTER  
Statewide Cataloging Support

- SrTp code, m
- Group of analyzable items (i.e., each piece has a distinctive title) that are related to one another by a collective title. The individual items may or may not be numbered. Use for any title that is a series, regardless of its treatment.

Memoirs are coded as m, Monographic series, in SrTp or Type of Continuing Resource.

Memoirs of the American Philosophical Society is a monographic series/continuing resource. I just mentioned that SrTp or Type of Continuing Resource is coded m for monographic series. Regl or Regularity is coded x, Completely irregular. Date 1 has 1935 (the first year the series was published). The 310 field or Current Publication Frequency informs us that the publication frequency is irregular (as seen from the Regl/Regularity code of x in the fixed fields). The 336-338 fields are coded for a book. The 362 0\_ field or Dates of Publication and/or Sequential Designation—Formatted style provides the first volume and year and the hyphen indicates that this is a current publication. The Library of Congress added the 500 note, letting us know that set 1 has been classed separately and includes v. 1-74 and v.196. A 655\_7 or Index Term--Genre/Form—Source is specified in \$2 of Biographies. \$2 lcgtf could be added. Since you may not see the 891 field often, I will briefly mention that as well. 891 or Publication Pattern Data—03 and 40 requires a \$9. Indicator definition dependent on the field recorded in #9. #9 contains the tag of the holdings field embedded in field 891. #8 Field link and sequence number, #a First level of enumeration, #b Second level of enumeration, #i First level of chronology, and #x Nonpublic note.

530 Lunched in 1900 by The New York Botanical Garden (NYBG), and with 120 volumes published as of 2019, *Memoirs* has traditionally focused on taxonomy and floristics, with an emphasis on plants of the Western Hemisphere. Most titles comprised a single volume, but quite a few were multi-volume titles and constitute some of the most-cited and substantial monographic publications of NYBG. In recent years, the *Memoirs* series has expanded to encompass field guides and botanical history as well. All in-print volumes of *Memoirs* through volume 120 are available exclusively through NYBG Shop. Volumes 121 and going forward are available exclusively through Springer.

530 Also available in print.

533 Electronic reproduction.

538 Mode of access: World Wide Web.

800 0 400 18 0001186797

This is *Memoirs of the New York Botanical Garden*. *Memoirs* are coded as m, Monographic series, in SrTp or Type of Continuing Resource. Date 1 has 2021 as the first year published. Let's look at the variable fields. The 264\_1 field has 2021- in \$c, informing us that this has been published since 2021 and is ongoing. The 310 field or Current Publication Frequency has Irregular. The 362\_0\_ field or Dates of Publication and/or Sequential Designation—Formatted style, has Volume 121 (2021)- again, letting us know that this is currently published and has been since 2021. From the screenshot on the right, there is a 530 field or Additional Physical Form Available Note informing us that this title is available in print as well. The 533 field or Reproduction Note lets us know that this is an electronic reproduction. I would add a 655\_7 Periodicals. \$2 Icgft. The 758 field or Resource Identifier provides a link to the work.

490 1 Proceedings Series
500 "April 2021"--Title page verso
500 "STIPUB1940"--Title page verso
520 "A plant life management (PLM) programme is an effective tool that allows an operator to manage ageing effects in structures, systems and components (SSCs) for long term operation of nuclear power plants. Such a programme helps facilitate decisions concerning when and how to repair, replace or modify SSCs in an economically optimized way, while assuring that the highest levels of safety are maintained. This publication is the proceedings of the fourth in a series of international conferences convened by the IAEA on nuclear power plant life management. The conference provided a forum for information exchange on national and international policies, as well as on regulatory practices, and for the demonstration of strategies, including their application in ageing management and PLM programmes for operating and new nuclear power plants. The proceedings include the opening address, presentations of the keynote speakers, summaries of the individual technical sessions, and conclusions and recommendations of the chairperson of the conference."--Publisher's description.
500 "The IAEA has periodically organized International Conferences on Nuclear Power Plant Life Management (PLM), with the previous three being held in November 2002 in Budapest, Hungary, in October 2007 in Shanghai, China and in May 2012 in Salt Lake City, USA. This year's conference was held from 23-27 October 2017 in Lyon, France and was significantly larger than the previous three in terms of participation."--Page 1.

Time of the overmen has book one as \$n, number of part/section of work, and Of mice and supermen in \$p, name of part/section of a work. Since this was cataloged as a book, there is no SrTp or Type of Continuing Resource code. Notice that the title from \$p is in a 246 3\_ or Varying Form of Title--No note, added entry, which means there should not be a 5XX with this title, but there should be a 7XX with this title, so let's look for a 7XX on the next slide. Of mice and superman (instead of supermen) is in the 246 3\_ field. I think this might be a typo.

# Electronic Parts and Numbers

Annual report of the Minister of Industry, Science and Technology under the Corporations and Labour Unions Returns Act has been cataloged as a Continuing Resource (notice the drop-down box at the top left). This was cataloged as a continuing resource. Date 1 is 1987, and Date 2 is 1988. Let's look at the variable fields. The 245 00 field or Title Statement, has the title in \$a, and \$n, Number of part/section of a work, has Part 1, \$p, Name of part/section of a work, has Corporations, and then the rest of the information is in \$c, Statement of responsibility, etc. The 246 14 has the cover title in English, CALURA, Corporations, with \$f, Date or sequential designation, 1987-1988. There is a 260 field for the publication information, which is fine, since the Desc or Descriptive Cataloging Form is coded as a for AACR2. In \$c, notice that there is 1990-[199-], so the cataloger decided the publication date was 1990 through 199-. However, the date should only appear in 260 \$c when the item is in hand, so the brackets should be removed, or the date removed from \$c. The 260 \$c should match Dates 1 and 2 in the fixed fields, so \$c could be changed to 1987-1988 or the fixed fields need to be changed to reflect the 1990-199-.

The 362 0\_ field or Dates of Publication and/or Sequential Designation—Formatted style, has 1987-1988, reaffirming that the publication dates were 1987-1988. The 362 1\_ field or Dates of Publication and/or Sequential Designation—Unformatted note, has Ceased in 1988. The 580 field or Linking Entry Complexity Note gives us the titles that this publication was split into along with the accompanying ISSNs. The 588 0\_ or Source of Description Note—Source of description informs us that the cataloger used the print version record to catalog this electronic version. There are multiple subject headings in the 65X fields.

100 1 Tomasi, Peter, #e author.

245 1 0 Batman and Robin. #n Vol. 1. #p Born to kill / #c Peter J. Tomasi, writer ; Patrick Gleason, penciller ; Mick Gray, Guy Major, inkers ; John Kalisz, colorist ; Patrick Brosseau, letterer.

246 3 0 Born to kill

Batman and Robin, vol. 1, born to kill was cataloged as a book (top left drop-down), as it should be. It was cataloged using AACR2 rules (Desc, Descriptive Cataloging Form is coded as a). Cont or Nature of Contents is coded as 6 for Comics/graphic novels. Let's look at the structure of the 245 field or Title statement. Batman and Robin is in \$a, title, Vol. 1 in \$n, Number of part/section of a work, and Born to kill in \$p, Name of part/section of a work. Notice that at the end of \$a, there is a period. At the end of \$n, there is a comma and then there is the space / space after \$p. There is a 246 30 or Varying Form of Title—No note, added entry—Portion of title, Born to kill.

For display purposes, I removed some of the Fast subject headings, 9XX, and 029 fields. As I mentioned in the previous slide, this was cataloged following AACR2 rules, so the 260 is the appropriate publication field. Let's focus on the 490 1\_ field or Series Statement—Traced, The new 52! (transcribing as found on the resource) and the 830 \_0 field or Series Added Entry--Uniform Title—No nonfiling characters, which has New 52 (authorized series title). There are two 655 \_7 or Index Term—Genre/Form—Source is specified in \$2. The first one is Graphic novels. \$2 lcgft which is a form term. The second heading, Comics (Graphic works). \$2 lcgft is also a form term.

This is cataloged as a book, as it should be, and it is a series. Notice that Form or Form of Item in the fixed fields is coded as o for online. Let's look at the 245 field or Title statement. Batman, one dark night is in \$a, title, Issue 1-3 is in \$n, Number of part/section of a work, and [electronic resource] is in \$h, General Material Designation, which is not used anymore, but Desc or Descriptive Cataloging Form is coded as a for AACR2, which did use GMDs, so \$h can remain unless/until someone enhances the record to RDA. This is a hybrid record, since there are 264 and 33X fields. The 264 1\_ has 2022 in \$c, the date of publication. The 264 2\_ field or Production, Publication, Distribution, Manufacture, and Copyright Notice—Distribution has \$b, Name of producer, publisher, distributor, manufacturer, Made available through hoopla.

```

520  | It was the sort of mission Batman had run a thousand times. From high above the sweltering summer streets of Gotham, Batman would escort the GCPD as the dangerous metahuman supervillain known as E.M.P. was transferred from a temporary holding cell to his permanent home at Blackgate Prison in Gotham Harbor. E.M.P.'s electrical powers posed a dangerous threat, but the situation was well in hand. Until it wasn't. Now every light in Gotham is out, the police have been knocked into disarray, and a broken, bleeding Batman must fight his way to Blackgate, block by block, dragging E.M.P. behind him. But it's not just the gangs who want to make life difficult for him. The dark corners of Gotham contain many surprises... and E.M.P. has many more shocks to deliver before the night is through! One of the most iconic Batman artists of the 21st century, the incomparable Jock (The Batman Who Laughs, Batman: The Black Mirror), has focused all his storytelling powers on the tale of one very, very dark night in Gotham City. It's always darkest before the dawn-if it ever comes... Collects Batman: One Dark Knight #1-3.

## Batman, Continued

I don't catalog graphic novels, but I found it unusual that there was a 521 8\_ field or Target Audience Note, no display constant generated, Rated M, since this is something that you typically see for movies. Notice there is a form term (655 \_7), Comics (Graphic works) \$2 lcgft. The 710 should have a \$e, relator term added.
